**Subject:** FW: Data for human study

he is calling me because concerns have been raised with the publication of some of our CTS data in connection with the study. (An inscrutable question came up to me from the CTS group which attempted to address this and I sent it back with questions, which prompted Roger calling me.) Apparently Mike raised issues with our using CTS data, which Roger is trying to investigate. I'm not sure what the legal vs. business issues may be and I'm still not sure I understand what this is all about. I asked Roger to send me the information from CTS that he would like to use so I can review. Any light you can shed on this?

When is a good time to call you tomorrow (Fri)?  
Roger

I remember you well and also very much enjoyed your presentation at our legal staff meeting in Richmond. I'm not sure what I can do for you in my area, but would be happy to discuss. Have you discussed with Kevin?

Dear Joe,

I don't know whether you remember me from the time I was at 120 Park (1999) with WRA and we were seeing each other enjoying the food at the management lounge. Now I am in Richmond, RD&E, in Rick Solana's organization Worldwide Scientific Affairs, as Director Human Studies.

I would like to discuss with you what we do and why we consider to use and publish a limited data set from a PM database for one of the key strategic scientific studies PM USA is undertaking. Please let me know, when we could connect on the phone. I will be traveling all of next week in Germany, but we might even then find a slot to talk (in the morning EST).

Looking forward to talk to you soon,  
Roger
